

Blair Blast

September 28, 2011

It seems like just yesterday that we were preparing for the first day of school. Now, the month of September has almost passed and the students and staff at Mont Vernon Village School are on their way to a very challenging and exciting school year. An indication of what we are capable of is seen in the recent release of the Science NECAP results. This assessment is given in May to the 4th, 8th and 11th grade students throughout the State of New Hampshire. When comparing Mont Vernon Village School's results with our counterparts in SAU 39, we scored the highest overall percentage for students scoring proficient or above. When the same comparison is made with surrounding school districts including Bedford and Hollis-Brookline, again we out scored all other school districts.

Finally, when you compare Mont Vernon Village School results with all fourth grade assessment results in the State of New Hampshire, Mont Vernon Village School's percent proficient scores placed us second in the State. Mont Vernon Village School increased the number of students scoring proficient or above proficient by nine percent. This equates to 83% of our students scoring proficient or proficient with distinction, second to Hanover at 84%. ***Congratulations to the students and staff for showing the State of New Hampshire what we are truly capable of achieving!***
